# DUALITY

Digital explorations of the human conflict

## Synopsis

---

### Digital explorations of the human conflict.

Duality illustrates the coexistence of two opposite entities. The color oppositions, the forms that demultiply in the space, the chaotic movements unveil this duality.

So many means representing our difficulties to evolve in a antinomic world, sign of a relection on our complex identities. The sound design, inspired from current electronic music, was realised to give an unrealistic connotation to this internal conflict.

## Screenings, awards and festivals

---

- 4th Istanbul International Animation Festival
- Rojo TV
- Root Magazine - # 4

## Production details

---
